CAUTION!

The information contained in this ebook will show you how you **can build an online presence almost instantly**, without building any websites, or registering any domain names.

However I want to caution you right here and now, that because it is so simple I'm afraid that some people may never move beyond the basics here.

That's a huge mistake, there's far too much money to be had... so please use these basics to learn the ropes and to get you started, but after you've built four or five money machines, PLEASE add more to them...

In the advanced subjects chapter at the end, I'll show you how easy it is to get an almost unlimited supply of graphics to add to your money machines, and I'll show you how simple it can really be....

But you need to learn how to walk before you can run, so that's why I've created this ebook that will show ANYBODY how to get on the net almost overnight at very little cost.

With that said, let's dig in and find out how simple it can be to build your first Internet Money Machine.

You Can't Pay Me Enough!

I don't get it! I just don't understand people sometimes. Or maybe the problem is I understand them too well.

Hello, my name is Frank Sousa. That's me on the left.

I have been earning a full time income on the Internet for the past twelve years, along with my two sons and daughter-in-law who work with me.

When I try to explain to people what I do the typical response is, "Oh, you build Web pages for people?"

You see, in most people's minds the only way you can make money is to work for somebody else. This mentality says that even when you're in business for yourself you really have to be working for somebody else. This might seem like a subtle distinction, but in actuality, it's a **huge** one.

You may have heard this before: **as long as you work for somebody else, you're just trading your time for somebody else's money.** Stop giving time, and you stop getting money.

IT DOESN'T HAVE TO BE THAT WAY!

Over the years I've had people call me up and offer to pay me (big money) to help them with their online businesses. My answer is always the same. You can't pay me enough, because once I'm done with you, my income stops.

I would rather spend my time building little "money machines" that earn money for me 24 hours a day 7 days a week.

Crank Up the Money Machines

My desire in this book/video series is to teach you the basics of how to build these little money machines that you can sprinkle over the Internet.

Those machines will continue to create money for you whether you're asleep, watching a movie, traveling or working. They work for you 24 hours a day, seven days a week.

I'm not going to make any claims of how much money you can make using this system but if each one only made \$10 a month, and you could build three or

four of these money machines each day (easily), how much could you make in a year?

No Web Pages Needed

Don't know how to write Web pages? Good—because you don't have to write any Web pages. What I'm going to show you is much easier than writing Web pages. You don't have to spend any money on advertising because what I'm going to show you will attract visitors all automatically.

I'm going to show you how you can use the power of Internet video, without ever having to even touch a video camera. You should be able to read through this entire ebook in about an hour, and you'll be able to see for yourself how easy, and how powerful this system is.

All I ask is you keep an open mind because in a few minutes you're going to grasp one of the most powerful and simple money making secrets you've ever seen.

I'm not going to get into advanced strategies like list building, copywriting, etc. Those things can be important. But if you follow this system, you won't need to build a mailing list, you won't need to do any copywriting and you won't even need to build a Web site. (All you'll need to do is make a very simple change in one Web site, which I'll show you in just a couple of seconds.)

I'm writing this ebook for the very rank beginner, but it works equally well for the experienced Internet marketer. You might want to skip over some of the basics—such as registering a domain name. But for others, this might be the first time you've ever been introduced to these concepts. I'm trying hard to give you all the information you need, so that you can start today to build your online empire.

All I Need is an Hour of Your Time

What I'm asking from you is an hour of your time and an open mind. Put aside all concerns it's too technical or too difficult for you until you finish this ebook.

I'm going to open your eyes to the easiest way ever to create a lasting income on the Internet. I'm going to lead you through the entire process, step by step. Watch what I do, follow these steps and you'll be amazed with the results.

So, let's get started...

No Fear

Let me outline what this system is all about and how it works to generate money for you automatically. Then I'll show you how you can embrace this technology to easily build two, three or four of these money making machines each day in just a few hours.

Over the years, I've been teaching people many of the techniques my sons and I have used to earn a very nice income. Up until now, though, I think **the one thing that held some people back** from adopting my techniques **was the fear they couldn't build Web sites.**

I've seen people let thousands and thousands of dollars slip through their fingers because they let that fear hold them back.

Along the way I've been looking for the "answer" for those people. During the past year, a new phenomenon occurred and grew at a tremendously rapid rate on the Internet. **It completely negates the need to build Web sites!** What is it?

Internet video.

Whoa! Back up. Don't you dare back out now, saying you could never create Internet videos. I'm going to show you how to capitalize on this paradigm shift and the best part is **YOU NEVER EVEN HAVE TO TOUCH A VIDEO CAMERA!**

Let me repeat that:

YOU NEVER EVEN HAVE TO TOUCH A VIDEO CAMERA!

Please trust me here. Take any preconceived notions you might have and put them on the back burner.

I want to help you make money—and I mean LOTS of money—on the Internet.

I think you'll find this is the easiest and most realistic way for a person to build up a good residual income that will make money for you 24 hours a day, seven days a week.

Driving Traffic...Before

Up until now, in order to drive traffic to a Web site you had to first build a Web site, and then work very hard to get good search engine rankings. No matter what you did, how you approached it, results were very iffy.

You had to spend money on pay per click advertising, and many people spent more on advertising than the ever made. That's the old way of Internet Marketing.

That has all changed...with the advent of online video.

Driving Traffic...Now

A year ago, there were online videos, but in order to use them, you had to put them on your own Web site, which used a lot of bandwidth on your account, and you still had to follow all the old rules of traffic generation.

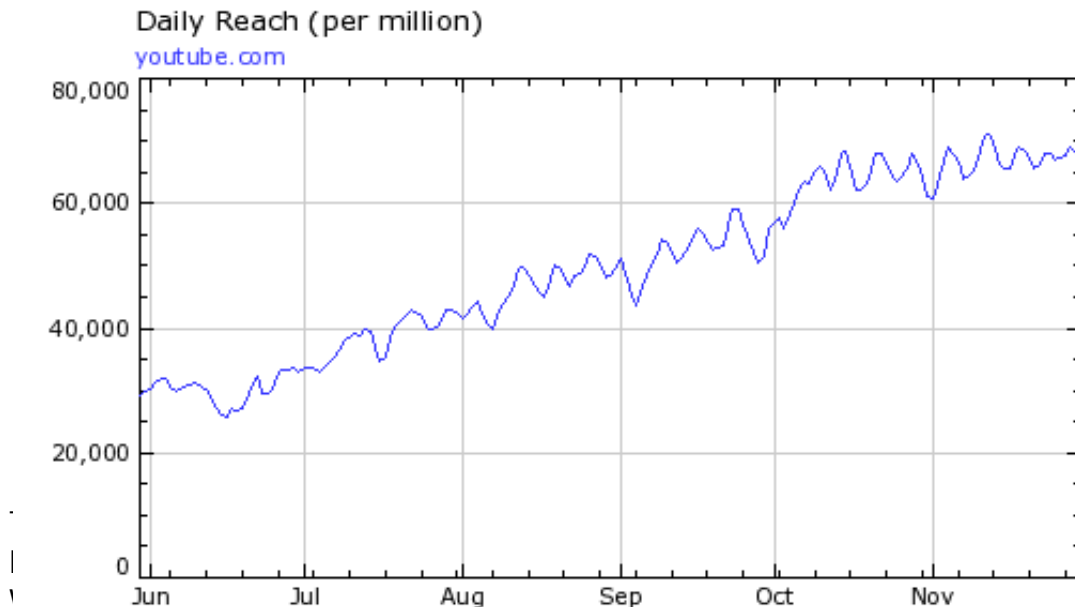

Then free video hosting sites began to pop up on the Web. These are sites where you send videos to be viewed by others. They began to *explode* in popularity.

I've seen some reports that predict more people will be browsing these video sharing sites than will be watching television in the very near future.

To add credibility to this, we see that Google has recently purchased YouTube.com for 1.65 BILLION dollars. That should give you a good idea of where the Internet is going. Google wouldn't pay that kind of money for a year-old Web site unless there was something to this online video thing.

YouTube gets more than 100 million visitors every single day! It is the seventh most popular Web site on the Internet today. Think about that for a moment. Out of millions and millions of Web sites, this one rose to number seven...in less than a year! The reason is people are rabid for video content—and I'll show you how to provide it to them very easily.

Just look at this growth over the past five months, and you'll see the power of what I'm talking about:

By using these free video hosting sites and search engines you don't tie up any of *your* bandwidth plus, you put your video in front of *their* viewers for free. No pay-per-click and no advertising. Just free traffic. In addition, we've found that by doing this, we're also seeing our videos showing up very high—almost overnight—in the regular search engine rankings.

Out of those 200 sites, we've identified about 30 of the major players I feel are most important, since they account for about 95% of the videos watched online. More importantly, they will drive their viewers to *YOUR* video.

Do you see the powerful opportunity you have here? I hope so, because *NOW* is the time to jump into this trend and capitalize on it.

The Recipe for Success... Add Affiliate Marketing

Your job is to blend this Internet video trend with another very hot and profitable trend: affiliate marketing. This is where your money will come from.

You may already understand the concept of affiliate marketing but if you don't, let me give a brief explanation.

There are hundreds of thousands of merchants selling products over the Internet who have affiliate programs. Here's how an affiliate program works:

- Sign up as an affiliate for a merchant or product

- Refer somebody to the merchant's Web site
- If that person buys the product, signs up for a service, or completes any other action the merchant desires, then it pays a commission to you for it.

Merchants have special software on their sites to determine the buyers came from you, because you refer the prospects to them through "affiliate links"—specially coded URLs that have your affiliate IDs embedded in them.

You can "sell" almost any product or service you want to sell through affiliate programs. I'm not going to go into all the advanced strategies or compare various programs and determine how to market them. That's because I want to keep the whole process so simple you really don't have to worry about those things. The whole idea of this ebook is to KEEP IT SIMPLE, and that's exactly what I intend to do.

So to recap, your job here is to capitalize on two very hot trends on the Internet—and that is to sell affiliate products through online video. Again, let me say it one more time, you don't need to even touch a video camera if you don't want to.

Step 1 - Find a Product to Sell

I could write a book about this subject alone. There are so many affiliate programs out there that you could work with, that you couldn't possibly ever run out of products to sell.

We have earned a small fortune by offering everything from information to hotel reservations, from cell phones to mortgages, and everything in between. In fact, **one day** last year we earned over \$5,000 by referring people to a florist for Mother's Day.

Again, to make this as simple and straightforward as possible, I'm going to focus on one product source: [Clickbank](#). I know people earning six figure incomes who specialize only in promoting Clickbank products. Getting started is very quick and easy, and you can do it today.

What is Clickbank?

Clickbank is a "clearing house" among affiliates like you and me, and product owners/creators. Clickbank carries many types of products but the most common are ebooks and software applications. Authors and programmers can register with Clickbank then make their ebooks or software available for affiliates to sell.

When an end user purchases a product offered by a Clickbank affiliate, Clickbank actually makes the sale and handles all the credit card processing. Then twice a month Clickbank sends a check to the author or programmer for sales that occurred during that period. Product owners/creators determine the commissions they want to pay affiliates. Typically, commissions range from 33% all the way up to 100%, if the owner is using the product as a lead generator. Owners control the online sales letter, as well as delivery of the product—digital download versus physical delivery.

[Clickbank](#) charges owners a percentage of sales to handle all that. The system is well organized and reliable.

From your position as an affiliate marketer, it's even easier and more advantageous because you can choose from many thousands of products to represent and sell online. And at the risk of repeating it, **you don't have to build a Web site to do it**. I'll show you the exact process.

Register

Your first task is to [register as a Clickbank affiliate](#).

[Home](#) | [Sign Up](#) | [Marketplace](#) | [My Account](#)

CLICKBANK® [Sell Products](#) [Promote Products](#) [Buy Products](#) [About Us](#) [Customer Service](#)

AFFILIATE POWERED E-COMMERCE, WORLDWIDE!

Welcome to ClickBank, the Internet's leading retailer of digital products.

ClickBank is the Internet's largest digital marketplace, where thousands of the web's most popular products are sold every day. Whether you're looking to buy, sell, or promote digital products, ClickBank is for you.

 Click Here	Sell Your Digital Products Today! Leverage over 100,000 ClickBank affiliates to find customers for your digital products and multiply your profits. Account setup is simple & fast. Find out why over 10,000 publishers already trust ClickBank. More Details... Click Here
 Click Here	Promote Products & Earn Commission Today! Setup is free, fast and you'll have instant access to over 10,000 products with commissions as high as 75%. You'll appreciate our fast & accurate tracking system and dependable payment services. We've never missed a scheduled payment! More Details...
 Click Here	Dedicated Customer Service! ClickBank has established an experienced support team dedicated to your success. Our customer service representatives are available to quickly and effectively resolve your account setup, maintenance and order related support needs. More Details...

In the left column is an icon that says "Become and Affiliate." Just click on that icon and follow through the sign up process.

Within moments you'll have your own Clickbank Account Nickname and Password. Together, these are your magic passport to an almost unlimited supply of product opportunities you can market every single day. You'll never run out of items to sell.

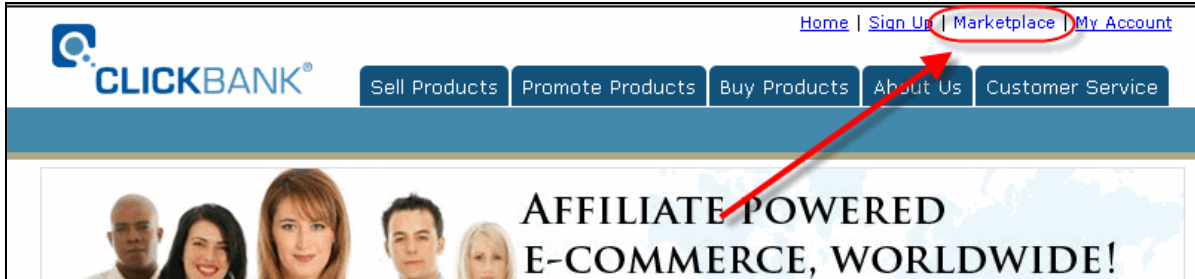

Don't lose this login information; it's very important to your business.

Search or Browse for a Product

Now that you have your Clickbank login, let's go find a product you would like to market. Then I'll show you how to create an automatic money machine around that product.

First, login to [Clickbank](#) again.

This time, click on the link at the very top that says "Marketplace." This is where to search for products you will represent.

The Marketplace page presents a variety of product categories you can search through or browse if you don't have specific products in mind and are looking for ideas:

- Business to Business
- Health & Fitness
- Home & Family
- Computing & Internet
- Money & Employment
- Marketing & Ads
- Fun & Entertainment
- Sports & Recreation
- Society & Culture

As you can see, the categories cover a wide range of interests. You can choose areas that interest you or areas you believe appeal to your target markets. All of work in the money machine system I'm going to show you.

Here, I've selected the category "Computing & Internet," and have decided to search for a very specific keyword—"Google." Why? Because, through my business and interests, I know many marketers are looking for ways to achieve

better rankings in Google for their Web sites. I want to target Internet marketers who are looking for higher Google rankings and search engine optimization.

Search the Clickbank Marketplace

Category: Subcat:

Keywords: Sort by:

Show: results per page

My search returned the page shown below. For this demonstration, I'll choose one particular product to use as our example, but you can use this same method to find virtually any Clickbank product for your target markets.

The screenshot shows the Clickbank Marketplace search results for 'Google'. The search criteria are: Category: Computing & Internet, Subcat: All Sub-Categories, Keywords: Google, Sort by: Popularity, and Show: 10 results per page. The search results list seven products, with the fourth product, 'Secret Spider Generator', circled in red. The product listing for 'Secret Spider Generator' includes the following details: '4) Secret Spider Generator. The Key To Google's Back Door. \$/sale: \$54.44 | %/sale: 75.0% | %refd: 83.0% | grav: 3.77 view_pitch_page | create_hoplink'.

Search the Clickbank Marketplace

Category: Subcat:

[view_pitch_page](#) | [create_hoplink](#)

7) [The Spyware Detective](#). The Only Professional Spyware Remover. Free Scan With Best Conversion Rates. Google, Overt

I chose this software product for several reasons. I am familiar with it because it is one of my own products. Later in this book, you'll see how you can get your own copy for free, but first, let's take a look at the product listing in depth.

Product Listing Details

There several links in the product listing. First, the name of the product, "Secret Spider Generator," is actually a link to my Web sales page for this product. Notice

the other link, "view pitch page." That also links to my to my Web sales page for this product so, as a prospective affiliate, you can see what I'm selling.

Between the name of the product and the "view pitch page" link is a line of cryptic green text. Here's what each figure means:

\$/sale 54.44

This is a weighted figure showing the average amount of a sale an affiliate earns once I account for customer refunds. Customer refunds are a part of life, and Clickbank makes it very easy—sometimes too easy—for customers to request refunds. So, this figure shows you how much money you might expect to make on the product per sale over time.

%/sale: 75%

This shows you the commission I pay you as an affiliate on each sale. Yes, 75% is a very good commission rate! Fifty percent is about average.

%refd: 83%

This shows the portion of total Clickbank sales of the product made by affiliates as opposed to the owner of the product. In this case 83% of the sales come in from affiliates.

grav: 4.55

This is a very confusing and not much used figure. It is supposed to show how many sales were made over a given period of time, but it factors in so many things that it's almost useless. Not many people I know use it.

So assuming this is a product you want to sell, how do you go about it?

Create a Hoplink

Let's click on the other link in the product listing that says "create hoplink."

This link takes us to this screen where we enter our Clickbank Account Nickname and an optional Tracking ID tag. (See below.)

Notice I used "15" in this example. If you assign a different Tracking ID to each money machine you build, then you'll be able to keep track of exactly where each sale comes from. But again, using Tracking ID tags are optional.

You can earn 75% for each paying customer you refer to this product. For details please enter your ClickBank nickname and [tracking ID](#) (if you have one):

ClickBank NickName:

Tracking ID (Optional):

No nickname? Click [HERE](#) to sign up first. Its free!

Once we click the "Submit" button, it takes us to this screen, which is the actual affiliate link you use to promote this product:

Affiliate Program: Promote Products - Microsoft Internet Explorer

ClickBank pays you 75% when you sell this publishers product. To refer a customer send them to this domain name:

<http://inyobus.secretspid.hop.clickbank.net?tid=15>

Cut and paste the following hoplink into your web page:

```
<a href="http://inyobus.secretspid.hop.clickbank.net?tid=15" target="_top">Click Here!</a>
```

The top link I've circled in red is the one you want to use. To capture this URL, just copy it with your mouse. You might also want to print this screen or save it someplace where you can refer to it often, like a folder on your desktop.

Your Affiliate Link

Now you have your affiliate link for this product.

{clickbank}/?tid=15

If a prospect clicks on it, he or she would be taken right to my Web site. And if he or she bought from that link then Clickbank would remember that the sale

was referred by you, the affiliate. In two weeks you would receive a commission check or PayPal payment from Clickbank for it.

You could promote this exact link in emails or videos as I will show you and you'd never need to have a Web site to do it. However, I don't recommend you use this link as is. Why? Because there is a nasty little problem on the Internet....

Affiliate Link Hijacking

The problem is called affiliate link hijacking. Fortunately, there's an easy solution. Many people on the Internet know how Clickbank and other affiliate program links work, so it is very easy for them to look at the above link and replace the affiliate ID (in this case "inyobus") with their own. If that happened I would lose the affiliate commission due to me.

Now, if you own your own Web site, you can create redirect links using your domain but I promised I'd show you how to do all this without having to build a Web site. Fortunately there's a very simple solution that doesn't require you build a Web site and it costs far less.

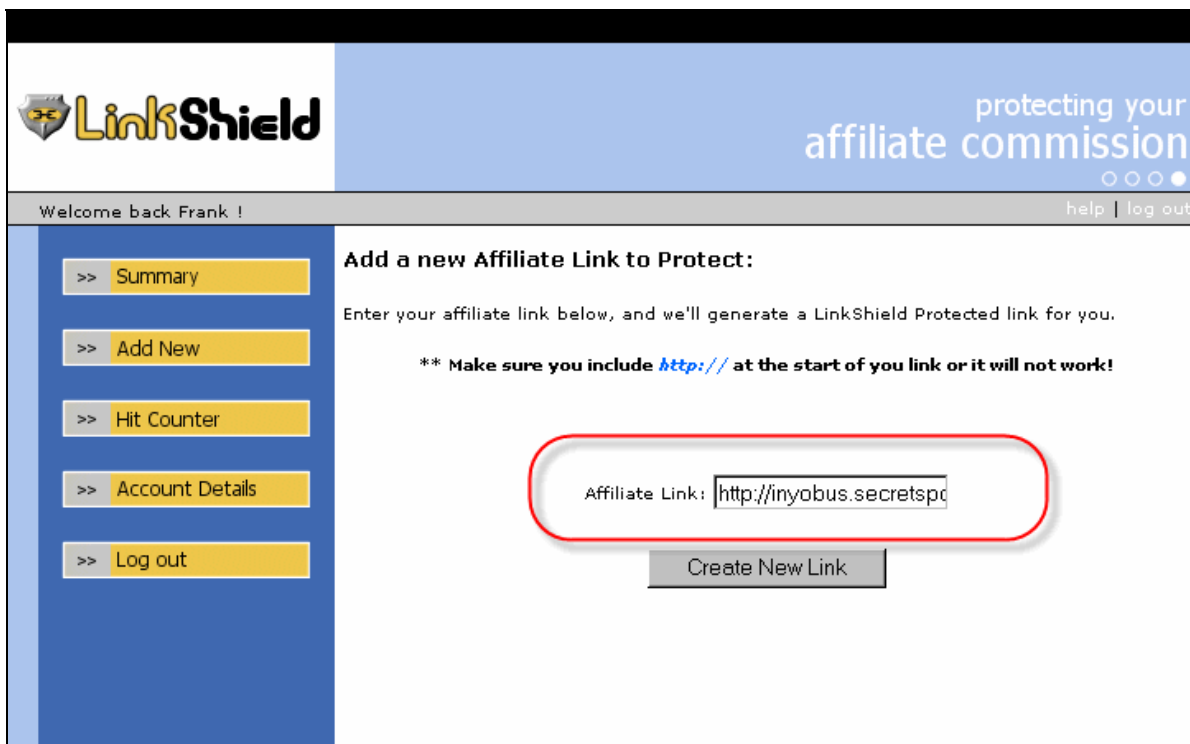

Protect Your Affiliate Link with LinkShield

All you need to do is register for a service called LinkShield, which will hide your affiliate link and send people directly to the Clickbank URL so you don't need to worry about someone hijacking your link or about having to build and host a Web site.

Go to [LinkShield](#) now to sign up.

It can cost less than \$5 a month and it will simplify your life greatly. Let me show you how it works.

After you've signed up for LinkShield, simply log in to the Web site using the "Members Login" button then paste your Clickbank hoplink in the form.

Note there's not enough space to view the entire URL, but it's there. If you selected and copied the URL you can simply paste the URL into the form. Then all you have to do is click the "Create New Link" button.

This gives you a different "redirect" link that you can use to promote your Clickbank product. Nobody will see that it's a Clickbank link or be able to steal your commission from you.

NOTE: You'll see two different links returned to you. There's a description of each of them, on the page you see, but to make things simple, just use the first one. That will work fine.

The screenshot shows the LinkShield dashboard. At the top left is the LinkShield logo. At the top right, it says "protecting your affiliate commission". Below the logo, it says "Welcome back Frank!". On the left side, there is a navigation menu with buttons for "Summary", "Add New", "Hit Counter", "Account Details", and "Log out". The main content area is titled "Add a new Affiliate Link to Protect:". Underneath, it says "Your new links are:" followed by two lines: "Secured: http://www.linkshield.com/s/865_1" and "Cloaked: http://www.linkshield.com/c/865_1". A red circle highlights the "Secured" link, and a red arrow points to it with the text "Use this one". Below the links, it says "Use one of these links when you promote your affiliate program." and provides links for "What is a Secured link?" and "What is a Cloaked link?". At the bottom right of the main content area, there is a "done" button.

Review Step 1:

You learned how to sign up as an affiliate with Clickbank, and how to find a product to sell. You also learned how to find your Clickbank affiliate "hoplink" for any product that Clickbank sells.

Finally, we discussed affiliate link hijacking and how to hide your hoplink so other people can't steal your commissions from you.

Assignment:

Register with [Clickbank](#) and find a product you would like to promote as your first product. You don't have to choose my product as I show you in the example. If you want to promote my Secret Spider Generator, that's fine. I certainly won't complain! But I used that simply as an example. Feel free to use any product you find in Clickbank.

Once you've found the product, click "create hoplink" to create your affiliate link for that product. Then selecting the link on the screen and copy it.

Next, register with [LinkShield](#), and create your first hidden link, pasting in the hoplink from the Clickbank product you're going to promote.

Step 2 - Create Your Money Machine

Okay, here's where the fun begins! We're going to create a video file that promotes the Clickbank product we selected in Step 1. Are you wondering how to do that if you don't have a video camera or just don't want to shoot video?

The answer is very simple. It's almost too simple, but it's very effective. The answer is: **create a slideshow**. You can do this in a number of different ways.

Microsoft has a free program you can use. It's called "[Photo Story 3](#)." Unfortunately, it only works with the latest versions of Windows XP.

This program enables you to take digital images—your photos, illustrations, etc.—superimpose text on them and create your own slideshow. It also allows you to add background music. When you're done, you have a complete slideshow "video" you can submit to the high traffic video hosting sites.

While the image quality of the final product is good but not great, Photo Story is a fine product. But there are some serious limitations.

A Better Way

I wanted to improve on some limitations in Photo Story so I spent six months developing a simple Web-based solution you can use with any version of Windows or even with a Macintosh computer.

Probably the biggest drawback to submitting videos to various Web sites is that they are large, data-intensive files. Submitting one video or slideshow to 30 Web sites can take up a lot of time—14 or 15 hours!—and tie up your Internet connection for the whole day.

You couldn't make two or three of these money machine slideshow videos a day if you had to spend most of your time submitting them. I knew there had to be a better way. That's why we created [Traffic Geyser](#).

With Traffic Geyser, you can create a slideshow on our server in just a few minutes. Then you can click a few buttons and automatically upload it to the top 30-plus video hosting services—without tying up your time or your Internet bandwidth.

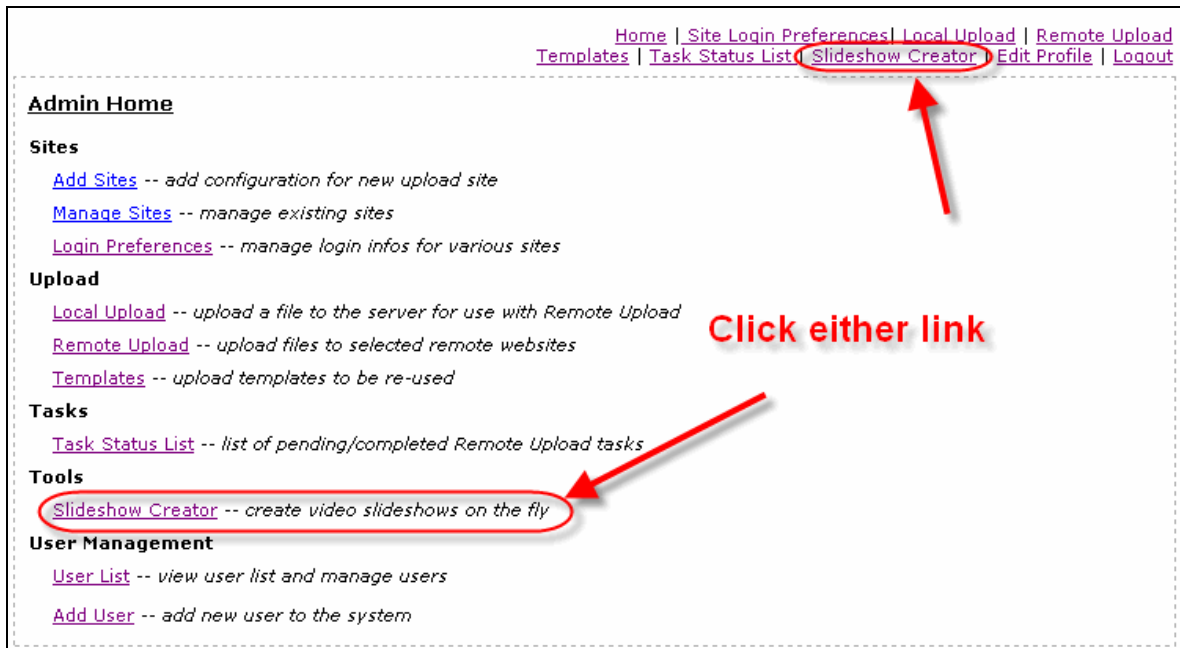

Creating Slideshow Videos with Traffic Geyser

Let me walk you through the steps to make a couple simple slideshow videos. In the first one, I'm simply going to use some free background music we include

with Traffic Geyser. You're licensed to use it in any video you create, both for personal and commercial applications. Traffic Geyser is a monthly online service so first, you need to login.

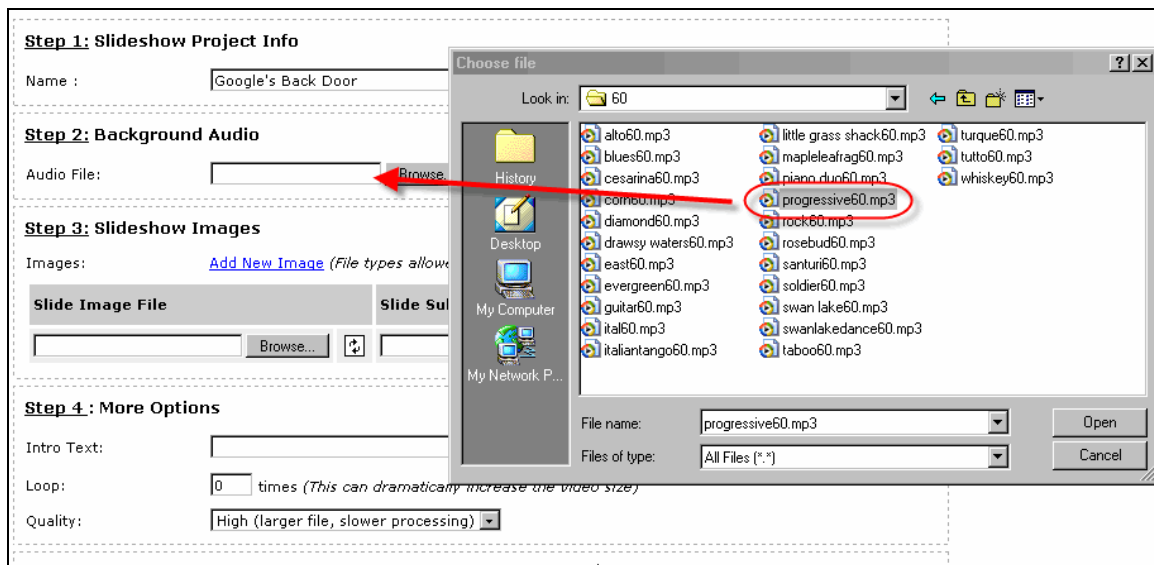

After you login, click on either "Slideshow Creator" link.

...which opens the Slideshow Creator.

I'm going to build a very simple slideshow first then I'll show you another variation.

In the next screenshot, you can see I've already entered a title, "Google's Back Door," and I've clicked on the browse button to find the "Background Audio" file I want to use on my computer. (Step 2.) I'll select the one named "progressive60.mp3." The Slideshow Creator uses either .mp3 or .wav audio files only. This is one of the free songs that come with Traffic Geyser.

The next step in the process is to simply assign images to the project. These are the "slides" that will appear throughout the slideshow. You can determine the number of slides you want to create by checking the length of your audio clip. Since this background song clip is 60 seconds, I think I'll make six or seven slides that will tell a compelling story and get the viewer to look deeper—that is, to **clickthrough to the product Web site** where it's then up to the product owner to convert the viewer from a prospect to a buyer.

In Step 3, illustrated by the next screen shot, I clicked on the "Add New Image" link six times to add six more slides. I could then select an image I created, a

photo I took or one I downloaded from public clip art sites. I like to use Clipart.com, which has many great images and is very inexpensive. We also include links to a couple other free sources in Traffic Geysers.

There are two locations you can add slide images from, your computer and your Traffic Geysers library. If you select the "Browse" button in the "Slide Image File" column, you can select any image on your computer and that image will be uploaded to your Traffic Geysers image library for your use in creating slideshow videos.

But you don't even need to do that. We've already loaded black and white background slides into your library, which you can use to **create text slides** right in the Slideshow Creator. If you click on the Icon with the two curved arrows, the display will change so that instead of choosing images on your computer, it will choose images already stored in your Traffic Geysers library. I've selected one of these default background images: "Background: Black Background" in this example.

Step 3: Slideshow Images

Slides: [Add New Slide](#) (Slide image file types allowed: .jpg .png)

Slide Image File	Slide Text	Slide Options	Interval (Sec.)	Order
Background: Black Background	How would you like to have the Key to Google's Back Door?	Options	4	0
<input type="text"/> Browse...		Options	4	10
<input type="text"/> Browse...		Options	4	20
<input type="text"/> Browse...		Options	4	30
<input type="text"/> Browse...		Options	4	40
<input type="text"/> Browse...		Options	4	50
<input type="text"/> Browse...		Options	4	60

Spread slides across the audio playtime

Note: A red circle highlights the icon with two curved arrows in the first row, and a red arrow points to it with the text "Toggle between local and remote computer".

Subtitle: Would you like to have the KEY to Google's Back Door? This will be my first slide.

For now, I'm going to leave the Interval at the default "4." I'll show you in a minute how you can get the Slideshow Creator to divide the slide intervals evenly for you. Otherwise, you can specify the length of time you want it to display before moving to the next slide.

Don't Reinvent the Wheel

You don't have to write the copy for your text slides. Just copy the keyword-rich subheads and text from the product's Web page and paste them into the other "Slide Text" fields. You're trying to grab the viewer's attention and get them to visit the product Web site.

IMPORTANT: Enter your LinkShield URL we obtained earlier into the last Slide Text field. This provides visual cue and call to action at the end of your video.

Step 3: Slideshow Images

Slides: [Add New Slide](#) (Slide image file types allowed: .jpg .png)

Slide Image File	Slide Text	Slide Options	Interval (Sec.)	Order
Background: Black Background	How would you like to have the Key to Google's Back Door?	Options	8	0
Background: Black Background	Get your website Spidered QUICKLY by Google and Yahoo!	Options	8	10
Background: Black Background	It's Easy, Fast and VERY effective!	Options	8	20
Background: Black Background	It's so simple a child could do it.	Options	8	30
Background: Black Background	No need to try to TRICK the Search Engines.	Options	8	40
Background: Black Background	Quicker than Blog and Ping	Options	8	50
Background: Black Background	www.linkshield.com/s/865_1	Options	8	60

Spread slides across the audio playtime

Step 4: More Options

Next, select the "Slide Options" link next to each slide to get a pop-up menu for choosing text color and text position on each slide. (See below.)

Traffic Geyser - Slide Options - Microsoft Internet Explorer

Slide Options for slide # 1

Slide textcolor:

Slide text position:

If these were images instead of text slides, I would see those in place of the black boxes. **If you want to modify any of the slides**, just make changes in the Slideshow Images section and click the "Update Preview" button.

When you're ready to create your slideshow video, just click on the "Generate Video" button...and the following message pops up at the top of the screen:

Your video will be processed and generated shortly. [Click here](#) to check the status.

[Home](#) | [Site Login Preferences](#) | [Local Upload](#) | [Remote Upload](#)
[Templates](#) | [Task Status List](#) | [Slideshow Creator](#) | [Edit Profile](#) | [Logout](#)

Click on the "Click here" link in the message to bring up the next screen:

Copyright ©2006 Kazzoe, LLC & Internet Marketing Associates, Inc. Patents Pending.

Refresh your screen periodically until the Status reads "**Completed**." Then you can download the video and view it on your computer. (NOTE: the Slideshow Creator creates .avi format videos, which you can view with Windows Media Player.)

Guess what?

That's all there is to creating an Internet money machine!

Well, not quite...you still have to upload your video to the top free video hosting services but we'll get to that in just a moment.

While I went through a lot of pictures and explanations here, you should be able to create an entire presentation like this one in 10 or 15 minutes. Compare that to the time and trouble it would take to:

- Buy a domain name
- Set up Web hosting
- Write a Web page
- Write advertising copy or content
- Drive traffic to your page

Now don't get me wrong, there are times you should do those things, but it's not within the scope of what we're teaching here. Our intent is to build a lot of online money machines quickly.

Review Step 2:

In Step 2, we created a series of text slides and "married" them with an audio file using the Traffic Geyser Slideshow Creator.

For the audio, we used one of the background music clips that comes in the bonus package of 101 Royalty-Free Music Clips you get with Traffic Geyser, but you will most likely use audio content you create such as interviews, promotional spots, teleseminars, testimonials, FAQs, etc.

NOTE: We also provide a tutorial in Traffic Geyser (with promotional script guide) for creating .mp3 audio files with just your telephone and computer.

Now we need to make this video available where people will find it and **drive traffic to the product Web site through your affiliate link**. That's Step 3 of the process.

Next, I'll show you how to get your video on more than 30 sites that receive *hundreds of millions of visitors a day*. They will host your video and provide the traffic—and it won't cost you any money at all.

Are you ready to turn on your Internet money machine?

Assignment:

Join [Traffic Geyser](#) and use the Slideshow Creator to create your own slideshow video.

STEP 3 - Turn on Your Money Machine

You've created your first money machine. Next is the most important step: **getting it viewed by people who want what you have to sell.**

How do you do that? Get some high powered help: the search engines. And not just the search engines like Google and Yahoo, but also the *video* search engines like YouTube, MySpace, video.google.com and others.

Here's where you bring it all together!

Search Engines Love Video

It's a fact, the regular search engines like Google and Yahoo love video. We're seeing great results and traffic coming to our Web pages as a result of uploading videos to the top free video sites. People find our videos when searching for their keywords. Then they watch the videos and come to our pages **pre-qualified** to buy.

Just about ANY kind of a video—including slideshow videos like the one we just created—will draw traffic if it is optimized properly and uploaded to multiple video sites. We have seen page one rankings in both the video search engines AND in the regular Google search listings for target keyword phrases in less than a day or two!

MarketingExperiments.com, an Internet marketing research company, recently conducted a test where they created 28 short video clips and uploaded them to the top video sites. Within two months, they recorded 1.3 million views of their videos.

That's not to say you're going to achieve similar results for each of your money machines. I make no promises about how the search engines—or prospective buyers—act. I'm just telling you what we've seen and what many other Internet marketers have seen—including Traffic Geyser members.

Here's how it works:

- Optimize your video with target keywords and phrases
- Upload your video to the top video Web sites
- Prospects find your video in the search rankings of both the regular search engines and the video search engines
- They watch your video, become interested in the product and clickthrough or navigate to the product Web page

- Monitor traffic to your affiliate's product site
- Create additional videos and upload as necessary

If you're ready, let's get started with Step 3.

Traffic Geyser Fuels Your Money Machines

You could accomplish what I'm about to show you without using Traffic Geyser but it will take much more time and you will likely earn less money doing it manually.

You could set up accounts at the 30 or so top video sites and upload your videos to them manually, but it will take up to 15 hours to upload one video that way—and tie up your Internet connection for that whole time. (There's a reason some of the top marketers pay full time staff to upload videos for them all day long: it's very time intensive.)

Now, if it takes that much time to upload one video to the top video sites, one of two things likely will happen: 1) you will upload your videos to just one or two video sites or 2) you will create fewer Internet money machines because you'll have less time to spend on the process.

Traffic Geyser does the heavy lifting for you so you get the maximum exposure for each of your Internet money machines AND you have the time to keep cranking them out.

Set Up Your Accounts and Login Preferences

Before you submit your slideshow video to the top video Web sites, you must register and open an account with each of the sites. This is free and easy to do, but if you make any mistakes here, your video will not upload, so take care to be accurate.

First, click on either of the "Site Login Preferences" links on the Traffic Geyser main page to access links to all the top sites.

[Task Status List](#) -- list of pending/completed Remote Upload tasks
[Slideshow Creator](#) -- create video slideshows on the fly

Click either link

Signup and Confirm Your Accounts

Clicking on the links in the "Site Name" column at the left will take you to the sign up page for each site. Try to use the same username and password for each site. Some sites use an email address for the username, so you might want to use your email address as your username at all the sites. After you sign up with each site, come back to this screen and enter your username and password.

Site Login Preferences [Help](#)

[Home](#) | [Site Login Preferences](#) | [Local Upload](#) | [Remote Upload](#)
[Templates](#) | [Task Status List](#) | [Slideshow Creator](#) | [Edit Profile](#) | [Logout](#)

Sn.	ID	Site Name	Username	Password
1	1	Blinkx.tv	<input type="text" value="wendy23"/>	<input type="text" value="mypassword"/>
2	27	Blip.tv	<input type="text" value="wendy23"/>	<input type="text" value="mypassword"/>
3	28	BoFunk.com	<input type="text" value="wendy@videocom.com"/>	<input type="text" value="mypassword"/>
4	2	Bolt.com	<input type="text"/>	<input type="text"/>

You don't have to wait for your video to upload to one site before uploading it to the next site and the next site and...Traffic Geyser will use this information to

upload your video for you to each site *simultaneously*. Plus, you only need to set up these accounts once; Traffic Geyser will remember your username and password for each site.

IMPORTANT: Site requirements vary, but some like video.Google.com require you to re-enter the site—even after you've registered and CONFIRMED your email—to check a box agreeing to their terms of service before you can start uploading videos.

Bottom line is: follow through with each site after you've signed up. Read the emails they send and follow their instructions.

After you're done registering for all the sites, you're ready to submit your video. The hard part is over, and you'll never have to do it again, except for new sites that will be added over time.

VERY IMPORTANT: Be sure to click the "Update" button at the bottom of the page before you leave this screen.

Upload Your Money Machine to the Top Video Sites

Next, click on the "Remote Upload" link in the top navigation of the Traffic Geyser screen. Here is the remote upload screen:

The screenshot shows a web form titled "Step 1: Common Login Information For All Sites" and "Step 2: Common Video Information For All Sites".

Step 1: Common Login Information For All Sites

Username: *

Password: *

Override: Use above info even if [login preferences](#) are present.

Step 2: Common Video Information For All Sites

(some fields might not be applicable for some sites, but just fill them in with appropriate values)

Video Title/Name: *

Video Author: *

Video Description: *

Video File: *

Step 3: Select Sites

Blinkx.tv Revver.com

Red annotations include a note "Note URL in both places" with arrows pointing to the Video Author field and the URL in the Video Description field.

the Slidesnow Creator—you would have to upload it to Traffic Geyser first using the "Local Upload" screen before you could upload it to the top video sites.

However, since we created our video using the Traffic Geyser Slideshow Creator, it's **already stored in our Traffic Geyser video library!**

Note the "Video File" pull down menu in the screen shot above. This allows you to select any of the videos you've uploaded to Traffic Geyser, as well as any slideshow videos you've created with the Slideshow Creator. NOTE: Traffic Geyser stores videos in your video library for five days.

Complete the rest of the form following the Traffic Geyser User Guide, which will help you optimize your video description, title and keyword tags to ensure the best possible results for your money machine.

- Select all the sites to which you wish to upload your video. (For example, some sites have weekly or monthly upload limits, so you can choose to exclude them from your upload.)
- Complete additional details for each site, such as keyword tags. Each video site has its own special information it includes with its videos. Traffic Geyser makes it easy to include this information on this same page.
- Save this project as a template. You can save any upload as a template so the next time you upload, just choose a saved template and you don't have to re-enter the same information.

This is nothing more than filling out a few forms. ANYBODY can do it.

Once this is set up you could spend maybe five or ten minutes making a slideshow and then no more than that to submit it. Even if you devote just six hours a week, you could have up to a hundred of these submitted to over 30 sites—that's more than 3000 separate postings. And **you can do this each and every month**. By the end of month two you could have 6,000...month three, 9,000 and at the end of a year you could have 36,000 of these Internet money machines bringing in cash for you.

Review Step 3:

Actually this is the simplest of all the steps. Consider each of your slideshows as a miniature online advertisement for your affiliate's product. **Instead of paying pay-per-click advertising fees, use the Slideshow Creator and Traffic Geyser to generate traffic to your affiliates' product pages and collect commissions** on them.

All you have to do is to pull up a previous template, select the new file from a pull down menu, change any description text and tags for any sites if they're going to be different, and submit another slideshow to all the sites.

If you were to do that on your own computer one at a time, you'd spend most of the day submitting ONE video, but by using Traffic Geyser, you can do it in just a few minutes...and you don't tie up any of your bandwidth, because it's all done by Traffic Geyser's super high speed servers.

Assignment:

If you haven't done so already...

1. Join [Traffic Geyser](#)
2. Create your own slideshow video the Slideshow Creator then
3. Upload your video to the top video sites with the Traffic Geyser uploader

Let's Review the Whole Process...

It may seem like we've been through a lot here, but it's actually very simple. Once you've registered with the video search engines and submitted your first slideshow video, you could complete the entire process from selecting an affiliate product to building a slideshow video to submitting it to the various video search engines in less than an hour.

Just like anything new it will take one or two times before you get the hang of it but once you do, you can create as many new money machines as your schedule permits. Here's what the process will entail once you get a couple money machines under your belt:

Step 1

- Go to [Clickbank](#) and choose an affiliate's product to promote.
- Get your hoplink and submit that to [LinkShield](#), so you can get your hidden affiliate link.

(There are many other sources for affiliate products which we cover regularly in the Traffic Geysers member newsletter.)

Total time involved: 10 minutes

Step 2

- Create your own one to two-minute audio file promoting the affiliate's product, using the special tutorial in the Traffic Geysers member site. (Equipment required: your telephone and computer.)
- Use the Slideshow Creator to "marry" the audio file with six to ten slides and create a slideshow video. (Create text slides within the Slideshow Creator or use your own images—those you download from [Clipart.com](#) or from similar free sites found in the Traffic Geysers tutorial.)

Total time involved: 15 minutes

Step 3

- Bring up one of your previous Traffic Geysers upload templates, modify it and submit your slideshow video to 30-plus top video search engines.

Total time involved: 10 minutes

The entire process could take you about half an hour to create and launch an Internet money machine.

Repeat this process as I suggest and you could **create an endless stream of Internet money machines—without ever building a Web site** of your own.

The key is to get started as soon as possible!

Advanced Concepts

Now that you've seen how easily you can build a web presence, let me show you a couple of simple things that will greatly increase your success rate.

Advanced Concept #1, put real images in the slideshow, to make it more interesting to your viewers.

I strongly suggest that after you build the first four or five videos, you add your own images to the background instead of using just a plain background. This will cause a lot more visitors to watch your slideshow till the end, and will result in a lot more money for you.

This is VERY simple and easy to do.

You first need to get images. To do that I go to clipart.com for most of my images. There are lots of other places that you can also download pictures, just be sure that you are not stealing somebody else's images.... That you are really licensed to use them.

Let me show you how simple it is:

First I log in to my clipart account. The screen shot below shows you an opening screen for clipart.com

Note that I have entered the word people into the search box. Then I simply select the "search button" to find images relating to people.

I simply click on the info/download link below the image that I want. From that point I'm taken to this page, which shows me more information about the image I want to keep. I select the download link at the lower right hand side.

Just Click Here

Keywords: [man](#), [Caucasian](#), [human](#), [body](#), [individuals](#), [individual](#), [persons](#), [JI-23567831](#), [Adult](#), [humans](#), [people](#), [working](#), [person](#), [tie](#), [business](#), [suit](#), [Male](#)

FORMAT	SIZE	DIMENSIONS	RESOLUTION	COLOR INFO	
Multimedia-Resolution JPEG	108.0K	307 x 800 pixels	72 pixels/inch	24-bit RGB color	Add to cart Download
Need this image in a higher resolution? Purchase from PhotoObjects.net.					

Next I'm taken to a blank screen with only the image that I want. No point in showing you a screen shot of that. Simply right click on the image and select "Save Picture As" to save the image to my hard disk.

Then when you build your slide show, simply select the image from your local computer from the drop down menu when you're building the slide show, instead of the background images that are in your account. The rest of the slide show creation is exactly the same.

Of course with the proliferation of digital cameras it's not that difficult to take your OWN pictures, which can be added to the slide show very easily.

Advanced Concept #2 Create your own audio files

Your slideshows will be more effective if you add a sales message in audio form to the slide show. We had one person who did this with

two videos, and within four hours he'd made three sales and earned a profit of over \$100.

While that's not normal to get those kinds of results so quickly, it shows you what can be done.

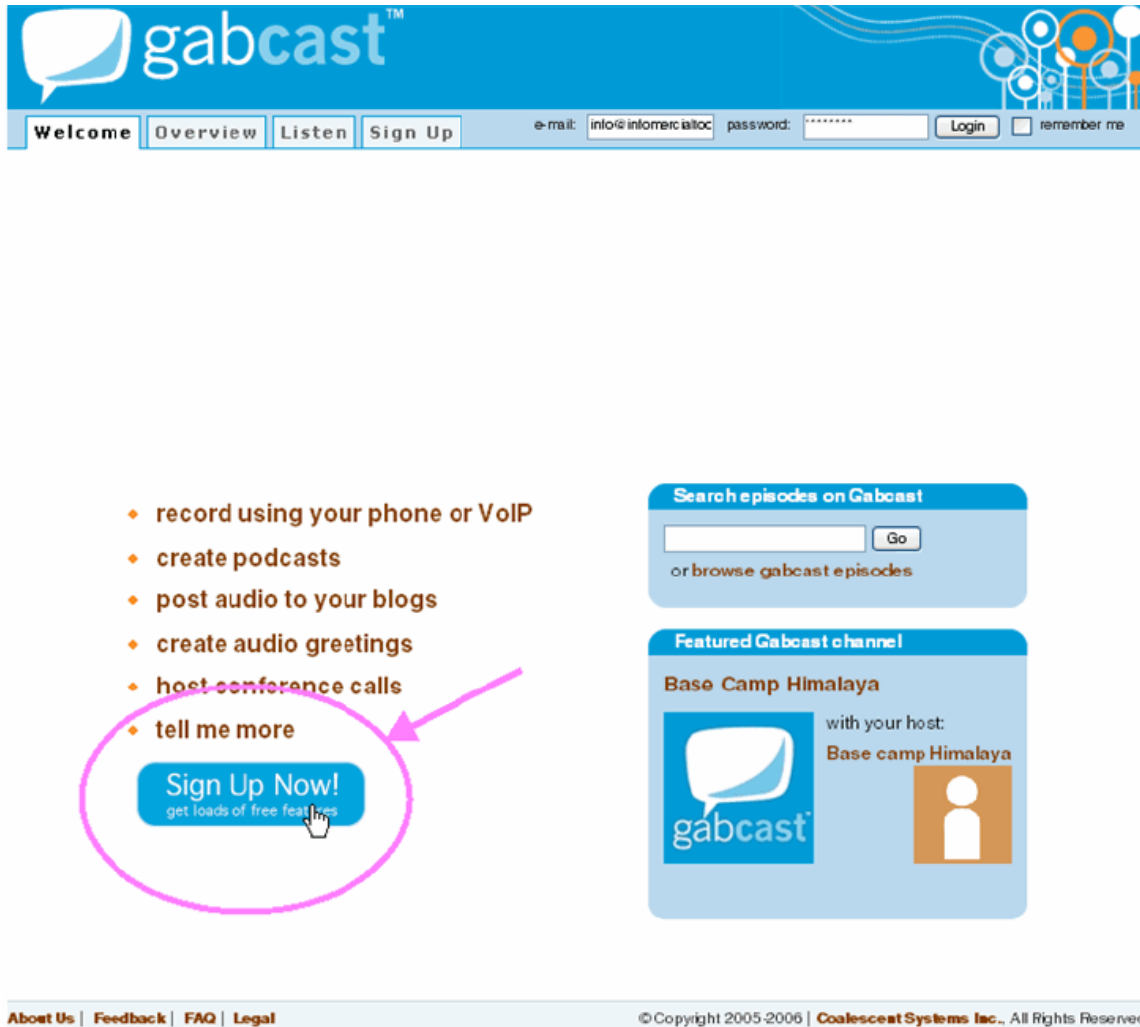

If you don't have audio content to use in Traffic Geyser's Audio-to-Video Slideshow Creator, or you want to create new audio content without the hassle of equipment, here's a quick, easy, affordable way to do it.

This technique uses a free third party Web service called [Gabcast](#). Because it is a third party service, Traffic Geyser can not control its quality and is not responsible or liable for its performance.

That said, here's how to get started... Here's a short tutorial put together by my good friend and partner Rocket Helstrom.

STEP 1 - Signup

Visit [Gabcast.com](#) and signup for the service. You need to click the activation link in the email to proceed.

You will then be sent a confirmation email to the address that you gave. Click on the activation link in the email to verify your email address, then go to Gabcast and login.

STEP 2 – Create a Channel

Next, choose the **Create** tab and click **My Account** to create a new channel.

The screenshot shows the Gabcast website interface. At the top, there is a blue header with the Gabcast logo and a navigation menu with tabs: **Create**, Listen, My Channels, My Greetings, Call Details, Edit Account, and Logout. Below the header, the main content area is titled "Creating Gabcast episodes" and includes the text "Recording your own Gabcast episodes is a breeze".

On the right side, there is a "Search Gabcast" search bar with a "Go" button. Below that is a "Gabcast access numbers" section listing various phone numbers for different regions:

- 1.800.749.0632 (USA only)
- 1.647.723.3682 (East Canada, Toronto)
- 1.403.775.9947 (West Canada, Calgary)
- 0207.100.2530 (UK, London)
- 3120.890.8137 (Holland, Amsterdam)
- 6129.037.1938 (Sydney, Australia)
- 6186.365.4411 (Perth, Australia)
- 656.622.6358 (Singapore)
- 702681 (Free World Dialup)
- 422@sip.gabcast.com (Gizmo / SIP)

Below the numbers, there is a link to "See our FAQ for even more ways to connect!" and a section for "International access numbers courtesy of:" featuring the VOXBONE logo and the text "The inbound VoIP Provider".

At the bottom right, there is a "Playback Tip" section with the text: "While on the phone and playing back your newly recorded episode, you can control the playback - just like an mp3 player!" and a partial line "# - fast forward 1 second".

On the left side of the main content area, there are several sections:

- Signup & Login**: signup and login to the website (it's FREE!)
- Create a channel**: visit your **My Account** page and create a new channel
- Use a phone**: call one of the Gabcast access numbers listed on the right side of this page
- Record**: start gabbing - tell the world what's on your mind!
- Publish**: publish your recording, either via the phone, or via your **My Account** page
- Tag**: tag your episode to make it easier to recognize and to make it searchable!
- That's it!**: subscribers to your channel will be notified via this website, **iTunes**, **web portals**, **rss clients**, and **email**

At the bottom left, there are two promotional boxes:

- Call any number, for Free**: Free calls to anywhere in the world in three easy steps - download now! [Ads by Google](#)
- Tracfone Int'l Calling**: Call Over 60 Countries For The Same Price As Local Calls with TracFone. [Advertise on this site](#)

Fill in the details on this screen. Your "channel" is your repository for the audio files you create. You can set up different channels for different topics or categories.

The screenshot shows the Gabcast website interface. At the top, there is a navigation bar with tabs: Create, Listen, My Channels, My Greetings, Call Details, Edit Account, and Logout. The main content area is divided into several sections:

- TG's channels:** A section for managing channels and episodes, with a note to tag episodes. It includes a "Create a new channel" button and a "channel number: 4896" field.
- My Promo Audios:** A section for product promotion audio recordings, with a link to "http://www.trafficgeyser.com". It shows "No episodes published" and buttons for "manage episodes", "edit channel", and "delete channel".
- Gabcast access numbers:** A list of international access numbers, including 1.800.749.0632 (USA only), 1.647.723.3682 (East Canada, Toronto), 1.403.775.9947 (West Canada, Calgary), 0207.100.2530 (UK, London), 3120.890.8137 (Holland, Amsterdam), 6129.037.1938 (Sydney, Australia), 6186.365.4411 (Perth, Australia), 656.622.6358 (Singapore), and 702681 (Free World Dialup). It also includes the email 422@sip.gabcast.com (Gizmo / SIP).
- Summary of Channels:** A section showing "No conference calls on record" and "Conference Call Minutes: Minutes Available: 30". It includes links for "Purchase Minute Packs" and "Record of Call Details".

Annotations on the screenshot include a pink circle around the "channel number: 4896" field, a pink arrow pointing to the "manage episodes" button, and a pink circle around the "1.800.749.0632 (USA only)" number.

STEP 3 - Record Your Audio

Make a note of the phone number and your channel number. Call the toll-free number and follow the prompts to record your audio. Gabcast gives you 200 MB of space for free and 60 minutes per recording.

Don't know what to say? Use this quick start product or service promotion script guide to write a brief script for yourself. Then just read it over the phone when you record your audio

Product Promo Script Guide

Here is a quick start guide to writing a product or service promotion script for your audio recording.

1. Have you had it with [problem common to your target audience]?
2. Doesn't it always seem like [variation on problem or aspect of the problem]?
3. And why can't anyone [one or more agitation of the problem]?
4. Forget about [the old, ineffective method or approach to the problem] and get ready to [solve the problem]
5. [Product or Service] is a [describe it] that will [solve the problem in a way that changes your life.]
6. [List top three features of your product or service and discuss what's in them for the customer.]
7. [Next, describe "how it works" or "what it does" in an all-emcompassing tag line sort of statement like "Top-level experts teach you everyghing you wanted to know about building your business online and aswer all your questions, one-on-one and face-to-face."
8. [Now offer some proof or a statistic that backs up what you claim]
9. [Finish with your offer and a call to action. Start with a "What if..." question.] What if you could ... [solve the problem] for \$X in one day [or some other significant time period]?
10. Then [do this: whatever it is you want to prospect to do – order your product, sign up for your newsletter, donate money to your cause, etc.] Just visit [your web page] and [take action] now.

Once you've recorded your audio, it will take a few minutes to appear in your Gabcast channel. Click on "manage episodes" in the lower left corner of the **My Channels** page.

Your recording (called an "episode" by Gabcast) appears in your list as an untitled episode. You can "tag" your episode by clicking on the tag icon. Here you give your audio file a title and description. It'll make it

easier to find if you create multiple files. You can play it and if you are unhappy with it, re-record it.

The screenshot shows the Gabcast website interface. At the top is the Gabcast logo and a navigation menu with buttons for 'Create', 'Listen', 'My Channels', 'My Greetings', 'Call Details', 'Edit Account', and 'Logout'. Below the menu, the main content area is titled 'Channel 4896's Unpublished Episodes'. It displays a single episode with the following details: 'No Title - 2006-11-21 07:17:06', 'No Description', and 'No Keywords'. There is a 'play' button and a 'Download File' link. A callout box points to the 'Download File' link with the text: 'Tag this recording with a custom title, summary, etc'. To the right of the episode list are three sidebars: 'Actions' with links for 'Unpublished Episodes (1)', 'Published Episodes (0)', 'Link to Remote Episode', and 'Upload Episode'; 'Summary of Channel #4896' showing 'Channel #4896 Space Usage' with 'Published: 0 MB', 'Unpublished: 0.2 MB', and 'Available: 199.8 MB'; and 'Account Navigation' with links for 'My Greetings', 'My Channels', and 'My Call Details'. At the bottom of the page, there is a footer with links for 'About Us', 'Feedback', 'FAQ', and 'Legal', and a copyright notice: '© Copyright 2005-2005 | Coalescent Systems Inc., All Rights Reserved'.

STEP 4 - Download Your Audio

Next you want to download your audio file for use with the Traffic Geyser Slideshow Creator.

RIGHT-CLICK on the "Download File" link and choose "Save Link As..." from the menu.

The screenshot shows the 'gabcast' website interface. At the top, there is a navigation bar with buttons for 'Create', 'Listen', 'My Channels', 'My Greetings', 'Call Details', 'Edit Account', and 'Logout'. Below this, the main content area is titled 'Channel 4896's Unpublished Episodes'. It displays an episode with the title 'No Title - 2006-11-21 07:17:06', 'No Description', and 'No Keywords'. The episode is 0.2 MB and in .mp3 format. A 'Download File' link is present, and a context menu is open over it, showing options like 'Open Link in New Window', 'Bookmark This Link...', and 'Save Link As...'. On the right side, there are three panels: 'Actions' (with links for 'Unpublished Episodes (1)', 'Published Episodes (0)', 'Link to Remote Episode', and 'Upload Episode'), 'Summary of Channel #4896' (showing 'Channel #4896 Space Usage: Published: 0 MB, Unpublished: 0.2 MB, Available: 199.8 MB'), and 'Account Navigation' (with links for 'My Greetings', 'My Channels', and 'My Call Details'). At the bottom, there is a footer with links for 'About Us', 'Feedback', 'FAQ', and 'Legal', and a copyright notice: '© Copyright 2005-2006 | Coalescent Systems Inc., All Rights Reserved'.

Then simply save the .mp3 file to your computer drive.

STEP 5 - Go To Traffic Geyser and Create Your Slideshow

Next, login to your Traffic Geyser account and click "Slideshow Creator" to upload your audio and create your slideshow video file

Just use this file as an audio background instead of a music background. There are very inexpensive audio editing programs that allow you to add music at the beginning and end of your audio file, but that's beyond the scope of this ebook.

Advanced Technique #3

Create a simpler smaller link to use in your slideshows. Admittedly the linkshield URL is rather long and it may cause some people not to bother to type it in. There are two other solutions.

Tiny URL.... There is a service on the net similar to linkshield called tinyurl. It accomplishes similar things, but it makes the link a bit smaller. The only negative thing I see about using them is that tinyurl is a very well known service and people recognize instantly that it's used to hide affiliate URLs. But on the plus side, it's easy to use, and you can't beat the price!

<http://www.tinyurl.com>

Affiliate Link Cloaker

By far, my favorite tool to use for hiding affiliate links is [Affiliate Link Cloaker](#)

This amazingly simple tool is always by my side, and it allows me to create short CLOAKED affiliate links in just seconds that I can put onto my slide shows or in effect ANY web page.

However I'll warn you up front, this is the first of the tools that violates my statement about you not having to have a domain name or ftp. You'll need your own hosting account, and be able to ftp your file over to the hosting account. Fortunately, MOST people using this system will already have both of those things.

Let me lead you through the process. Let's say that I sign up for a Clickbank product, and my Clickbank ID is <http://hop.clickbank.net/?inyobus/cloaklinks>

Anybody could easily see that is a clickbank ID, and they could replace the Clickbank id inyobus with their own, and then they would be able to steal my commissions.

However using Affiliate Link Cloaker I can very easily get around that.

When you run the program, you'll get this screen. Note I've filled in step 1 and step 2. Normally to do what I'm doing you only need these two fields, and step 2 will be called links.html. That way when people click on this link:

<http://www.coolwebtips.com/links.html>, they will be directed to the site that I'm promoting.

Then just click on the "next" button.

Steps 1-3 | Steps 4-5

Step 1
Enter the link you want to hide:

NOTE: Link must start with http://

Step 2
Enter the name of the "cloaked" page: .

Step 3 - optional, leave blank if not used

Enter page Title (50 characters):

Enter page Keywords (100 characters):

Enter page Description (200 characters):

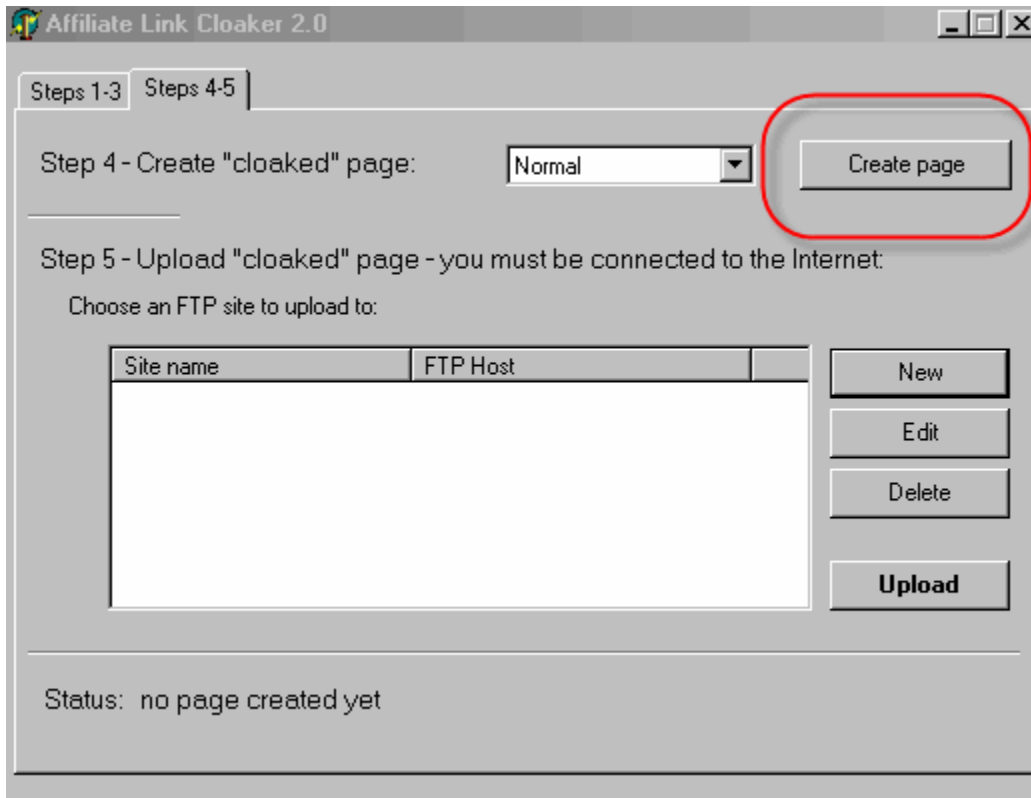

Enter page Body Text with HTML formatting:

[Fresh NEW Affiliate Marketing Idea of the Month](#)
[>> Click Here Now](#)

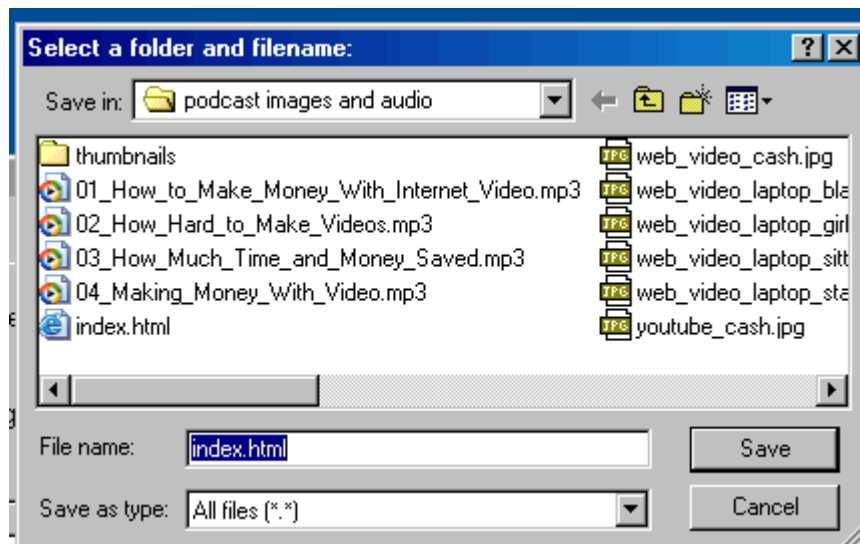

Next >>

Copyright (c) Affiliate Link Cloaker [Online Support / Help](#)

You'll be taken to this screen. Just click on the Create Page screen.

Then you'll be asked to save the file. Save the file onto your hard disk

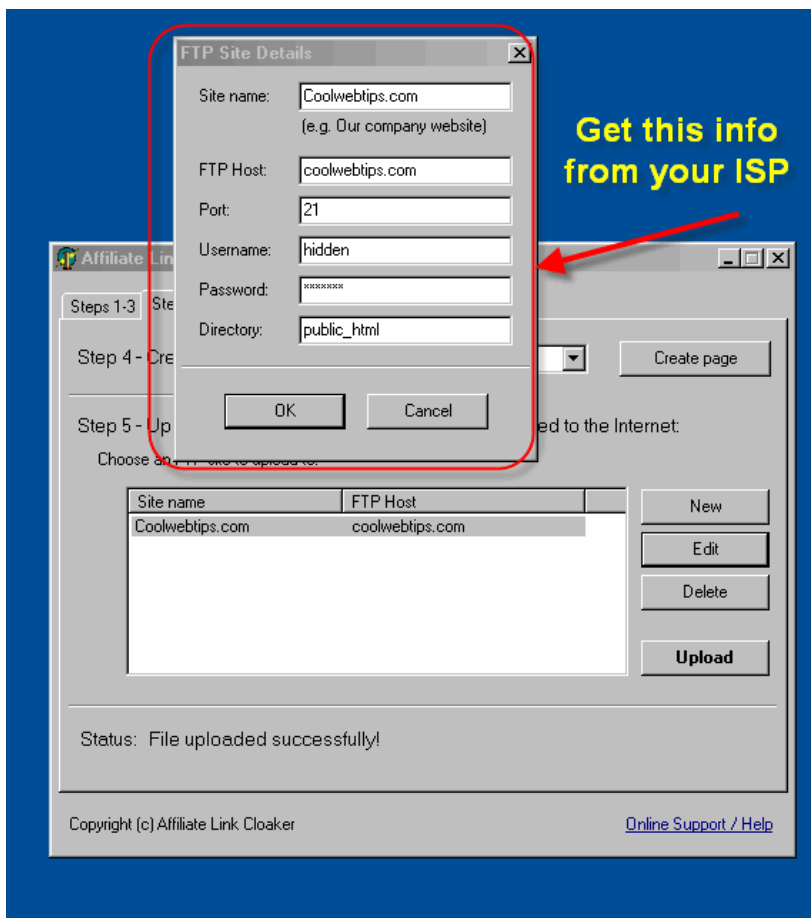

The last step is to copy it across to your web hosting account. The program makes it very easy, just by clicking on NEW in step 5, and then enter in your FTP information. (You get that information from your hosting company)

In the following example, I'm going to put the file into my coolwebtips.com account, so the entire URL would be :

<http://www.coolwebtips.com/links.html>

In step 5 I click on the "New button, and a pop up menu comes up asking for my ftp information. Just fill that out with your ftp information. If you don't know what that is, then contact your hosting provider and ask them.

Note the bottom field public_html. MOST hosting accounts place your web pages in a directory called public_html. Click OK when the ftp information is entered.

Finally, just click the upload button and the file will be copied across to your hosting account.

That's all there is to it, now you can use your own domain name to host these cloaked affiliate links... it looks very professional and it's easy to do.

SUMMARY

OK... I have shown you a simple way that you can begin to make money over the Internet. I've shown you how you can get started without building any website, doing any FTP or setting up any domain names?

I have shown you a way you can create your slideshows for FREE and how you can manually submit them to high traffic websites for FREE. So from this point you can actually get going without spending any money whatsoever. However, you will soon get into this in a big way, and that's when you'll want to use Traffic Geyser to create and submit many of these money machines each day.

The big question is what are YOU going to do with this information? Toss it and continue to seek the next "opportunity"? Or are you going to do something about it. My good friend Sterling Valentine says "If knowledge was power, then librarians would be the richest people in the world". So I've just given you the knowledge, but the real determining factor is what you do with that knowledge.

If you set a goal to create two money machines a day, you'll begin to make money. **You're not going to get rich overnight...** but you will have STARTED on your way. Building just two a day, and allowing for some days when you don't have any you could easily have over 600 money machines working for you by the end of the year. Submitted to 30 sites each, that's 18,000 chances for you to make sales... and that's all while you're sleeping.

You'll find that within two or three weeks your slideshows will have been viewed hundreds or sometimes even thousands of times. Out of those views will come sales, and with that some extra money.

The real key is consistency of action. Do a little bit each day, and strive to make each slide show a little bit better than the one before.

I've tried very hard to give you a starting point. Almost everybody can do this. But I can't FORCE you to get started. You downloaded and read this report because you were interested in making money....

So what's your excuse? Start today!

My best wishes to you for continued online success

Frank Sousa

How to make money by giving away this ebook

This ebook is a powerful tool that allows you to draw additional income from several different sources.

It's a "branded" ebook, meaning that you can embed YOUR affiliate links into the ebook, and every time somebody purchases any of the products mentioned in the ebook, YOU will earn commissions on them. That can go on for years....

Step 1..

First you'll need to register with Clickbank.

Step 2..

You'll need to become an affiliate of Traffic Geyser. To do that go to <http://trafficgeyser.com/jv> and follow the directions. We pay 33% commission every month to our affiliates. (You cannot earn commissions on your own purchase, that commission goes to the person who gave you this ebook), but all subsequent sales originated from YOUR branded copy of the ebook are yours.

Step 3 (optional)..

You can also sign up as an affiliate for commission junction. Once you do, you'll need to get your affiliate link for clipart.com. It's a little more difficult to get your affiliate link for this one through CJ, so if you just want to ignore it, don't worry it's not a major factor in this formula.

Step 4..

Login to this online form and fill in your affiliate information:

<http://www.trafficgeyser.com/moneymachines>

From there you'll download another copy of the ebook with YOUR affiliate information in it. Now all you do is give away copies of the ebook in any way you can. Give them to friends, take out very small inexpensive ads in your local shopping papers offering a free ebook on how even a total beginner can start making money on the Internet. If you have a website, put an article on your website about the free ebook.

If you don't have a website, but would still like to set up a place where people can download YOUR ebook, contact me at frank@trafficgeyser.com and I'll help you do it.

Accolades for Traffic Geyser and the Slideshow Creator

"Traffic Geyser ROCKS!! I couldn't believe it. Within 15 minutes after pressing the 'submit' button, my video showed up on several hosting services. Then my video showed up on Google Search results in hours."

-Google Expert Joel Comm

Revolutionary changes have transpired in the past few months that involve the convergence of new, unprecedented forces with proven technology and you're among the first to see how it works.

Mere months ago, there were zero free video hosting Web sites online streaming zero videos. Today, there are more than 200 free video hosting services streaming MORE THAN 7 BILLION VIDEOS A MONTH.

Hundreds of millions of videos are now viewed each and every day online. The top 30 free video hosting services account for 99% of that volume.

And the search engines are paying attention. In an extraordinary way! Guess what happens when you tag your videos properly and submit them to these top free video sites? YOU GET MASSIVE TRAFFIC!
